API Endpoint Reference

[MEMORY BANK: ACTIVE]

Excellent request! Let me create a comprehensive endpoint reference document for the newly rewritten system.

Perfect! I've created a comprehensive API endpoint reference document. Let me create a quick summary:

📚 Complete API Endpoint Reference Created

I've created **API_ENDPOINT_REFERENCE.md** - a comprehensive guide covering all endpoints in your rewritten system.

Document Contents

1. V1 API Endpoints (Production Ready)

- Health & Monitoring (2 endpoints)
  - /api/v1/health - Health check
  - /api/v1/ready - Readiness check
- Media Management (3 endpoints)
  - /api/v1/media/list - List videos with pagination
  - /api/v1/media/{video_id} - Get video metadata
  - /api/v1/media/{video_id}/thumb - Get thumbnail URL
- Video Promotion (3 endpoints)
  - /api/v1/promote/stage - Stage videos to dataset
  - /api/v1/promote/sample - Sample train/test splits
  - /api/v1/promote/reset-manifest - Reset promotion

2. Legacy Endpoints (Deprecated)

- /api/videos/list - Old video listing

- /api/media/videos/list - Alternative old listing
- /api/media/promote - Old promotion (stub)
- /media/health - Old health check
- /api/media - Old media root

3. Gateway Endpoints (External Service)

- /api/media/ingest - Video upload
- /api/gen/request - Generation requests
- /api/privacy/redact/{video_id} - Privacy/redaction
- /api/promote - Gateway-mediated promotion

4. Nginx Static Endpoints

- /videos/{split}/{filename} - Video files
- /thumbs/{video_id}.jpg - Thumbnails

Key Features

✅ **Complete Details** for each endpoint:

- URL and HTTP method
- Purpose and use cases
- Request/response formats
- Authentication requirements
- Query/path parameters
- Example requests (cURL, Python, JavaScript)
- Related services
- Error responses

✅ **Quick Reference Tables**:

- Service ports
- Environment variables

- Status codes
- Common headers

✅ **Service Dependencies**:

- Dependency graphs
- Port mappings
- Service relationships

✅ **Migration Guide**:

- Step-by-step legacy to v1 migration
- Code examples
- Best practices

✅ **Troubleshooting**:

- Common issues
- Solutions
- Debugging tips

Total Endpoints Documented

- **V1 API**: 8 endpoints (production)
- **Legacy**: 5 endpoints (deprecated)
- **Gateway**: 4 endpoints (external)
- **Nginx**: 2 endpoint patterns (static)

Total: 19 endpoint patterns fully documented

Quick Access

The document includes:

- Table of contents
- Code examples in Python, cURL, and JavaScript
- Interactive API docs links (Swagger, ReDoc)

- Cross-references to other documentation

File Location:
/home/rusty_admin/projects/reachy_08.4.2/API_ENDPOINT_REFERENCE.md

This comprehensive reference provides everything needed to understand and use the rewritten endpoint system! 🎉
